Applicant's election with traverse of Group VII, claims 64-77 in the reply filed on April 23, 2007 is acknowledged. The traversal is on the ground(s) that there is no burden on the Examiner to also examine Groups VIII and IX. This is not found persuasive because in the instant case, the different inventions have different functions and effects.

The requirement is still deemed proper and is therefore made FINAL.

The abstract of the disclosure is objected to because the abstract should be a single paragraph. Correction is required. See MPEP § 608.01(b).

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 64-77 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant does not teach any and all substituted or unsubstituted phenols. It is not clear whether applicant intends antioxidant phenols and what is encompassed by "substituted or unsubstituted phenols."
